## WORKING PLATFORM\*

P 26.6 LP - P 26.6 LPT - P 26.6 SP - P 26.6 SPT

P 26.6 SP - P 26.6 SPT

### REDUCED DIMENSIONS

- Two types of cab are available:
  - Standard profile cab (handlers S series) with 2150mm height.
  - Low profile cab (handlers L series) with 1995mm height.
  - For all models the width is 2000mm.

### SAFETY DEVICES

- An overload warning device activates both audible and visual signals and blocks further overloading actions.
- All boom and lifting hydraulic cylinders are fitted with pilot-operated check valves.

### BOOM

- Two telescopic sections, made of high yield steel, each sliding on adjustable anti-friction pads.

### CAB

- The high yield steel frame conforms to ROPS (ISO 3471) and FOPS (ISO 3449) standards.
- The internal width is 940mm.
- Boom movements are controlled with a "4 in 1" Merlo joystick control.

### HYDRAULIC SYSTEM

- Gear pump, with operating pressure of 210 bar and maximum flow of 91 lpm.

### ENGINE

- Low emission 4 cylinder Diesel engine located longitudinally on the right side of the chassis (Merlo patent).

### HYDROSTATIC TRANSMISSION

- Two speed range gear box electrically operated.
- An "Inching-Control" makes it possible to precisely vary travel speed independently of engine speed.
- With the "Finger-Touch" system it is possible to change driving direction even when the machine is moving, without the operator having to remove his hands from the steering wheel.

### STEERING

- All four wheels are steered, with auto-synchronisation realigning the steering wheels should they become misaligned:
  - Front Wheel Steer.
  - Four Wheel Steer.
  - Crab Steer.

### CARRIAGE

- The 'Tac-Lock' quick attachment fitting system is hydraulically controlled from the cab.
- Two boom-end mounted hydraulic lines are provided, which can be combined as a single double acting service.

### FORKS

Floating type with a length of 1200mm and section 125 x 45mm. Centre to centre fork distances manually adjusted from between 450 up to 1010mm.

### BRAKES

- Hydraulic service disc brakes are fitted to all four wheels, operating on the differential output shafts.
- A 'Fail-safe' spring-operated, hydraulic release, disc parking brake is fitted to the main transmission output shaft.

### ELECTRICS

- 12V system with 100Ah battery and 65A alternator.
- Full road lighting and flashing beacon.
- Electric cable inside the boom to supply a electric socket (12 V - 10 A) at its end.

### CAPACITIES

- Hydraulic oil: 95 l
- Diesel fuel: 100 l
- Hydrostatic oil: 12 l
- Engine oil: 8,5 l
- Coolant: 12 l

### TYRES

- 400/70-20

### \* Version:

- Basket controlled.
- Basket controlled machine drive (depending upon national requirements).

### OPTIONS

- Cab mounted working lights
- Pneumatic seat<sup>(2)</sup>
- Rear differential lock
- Prearrangement for attachments requiring two hydraulic services (e.g. concrete mixer)
- Air conditioning
- 405/70-24 tyres

<sup>(1)</sup> Standard on P 26.6 LPT and P 26.6 SPT

<sup>(2)</sup> Only on P 26.6 SP and P 26.6 SPT
